

'Living Thing'

Expand Your Musical Tastes with PB&J

by Andrew Dixon

Many of you have heard the catchy song "Young Folks" by Peter Bjorn and John. It was a huge hit, near the top of many music charts around the world. Kanye West even used the beat from "Young Folks" on one of his mix tapes.

However, except for their popular song "Young Folks," the Swedish Indie band Peter Bjorn and John (PB&J) are mostly unknown.

Peter Bjorn and John's new album, *Living Thing*, is much different from their previous albums. PB&J have started to experiment with new music concepts.

They have separated themselves from the mainstream music that they had made on their third album, *Writer's Block*, and moved on to a more experimental genre.

On this album, PB&J created lyrics that are far from ordinary, lyrics that sometimes make you think deeply about the meaning and other times make you wonder what they were thinking when they wrote the songs.

There is not really a single song that stands out the most on this album. The album seems to flow really well together and each song complements the last.

My favorite song on the album, "It Don't Move Me," is not the current single off of the album, but it seems to have more rhythm and deeper lyrics than the current single, "Nothing to Worry About." Another song, "I Want You!" has a good melody and the lyrics leave an imprint on your mind.

Overall, this album is good for someone who wants to hear something new and different. Still, it lacks the catchy lyrics and memorable sounds that will attract new listeners.
